MISSION

LEARNING AND TEACHING

of the Technical University of Applied Sciences Wildau

With this mission, we want to bring our teaching at the Technical University of Applied Sciences Wildau into the future.

The mission was jointly developed by students and teachers in 2021.

We are enthusiastic about science and its practical applications.

We learn and teach both with and from each other. We focus on the educational needs of people and are oriented towards the labour market. The challenges of the future give us incentive.

We promote individual courses of education.

We offer flexible approaches to study and different qualification formats – from certification courses to Master’s programmes. We thus promote lifelong learning and create diverse opportunities for education.

We have social responsibility in both learning and teaching.

We reflect on the consequences of decisions in both companies and organisations. We bear responsibility for the development and handling of technologies.
We learn and teach sustainability.
We contribute to the necessary social transformation. We develop concepts and technologies for the responsible use of resources and a fair coexistence.

Our teaching is interdisciplinary.
We network content, processes, and specialisations in order to take on practical tasks. We bring together different perspectives, skills, and people. We cooperate with a wide range of companies and organisations from the field.

Our teaching is skills-oriented.
We teach and develop skills for self-determined action. This includes professional and methodological as well as personal and social skills.

Our teaching is research-oriented.
We incorporate current research findings into our scientific training. Students can participate in applied research projects.

Our teaching is networked both regionally and internationally.
We promote international mobility and cooperation in both learning and teaching. We are part of a dynamic immigration society and support the cohesion of this.

Our teaching is diversity-sensitive.
We stand for equal opportunities, anti-discrimination, and accessibility in teaching. This applies in particular to gender, age, skin colour, origin, faith, sexual identity, and ability.
We create a positive learning environment.

We learn and teach both on campus and in digital spaces. We create attractive and flexible learning and meeting places for both individuals and groups. We thus cover different learning needs in a spatial manner.

We learn and teach together.

Learners and teachers support each other and ensure an appreciative cooperation. We cater to individual needs in small learning groups.

We reflect on and develop our teaching.

A culture of open feedback, jointly developed quality, and the courage to change are essential components of both our learning and teaching.

Wildau, 17. March 2022

dez. Prof. Dr. rer. nat. Ulrike Tippe
The President
of the Technical University of Applied Sciences Wildau
