zum

# Institutsseminar

**Datum:** 29.05.2017 | **Beginn:** 16:30 Uhr | **Raum:** 16-0095

## Themen:

1. Dr. Christian Rogge: *“in-situ pH Messung für Kleinstvolumina”*
2. M. Sc. Liane Kober: *“Analytical challenges in the detection of environmental micropollutants: on-site sampling, high-throughput analysis and automated risk evaluation of TNT contaminated soils”*
3. Dipl. Biochem. Dmitri Ciornii: *“Biomolecular photo-switchable electronical circuits: the competition between photo- and enzymatic catalysis“*
4. Giovanni Fusco: *“Polymer-supported electron transfer of PQQ-dependent glucose dehydrogenase at carbon nanotube modified by electropolymerized polythiophene“*

Wir freuen uns auf die Vorträge und eine rege Beteiligung !
