

**Institut für Angewandte
Biowissenschaften**

Institutskolloquium

*am 03.12.2018 um 16:00 Uhr
Haus 16, Raum 0093*

Institutsvorträge:

Tutku Ceren, *visiting scientist*

“Development and validation of HPLC method for simultaneous determination of Betamethasone dipropionate and ketoconazole in cream formulations”

Dmiotri Ciornii, *AG Biosystemtechnik*

“Connecting photoactive biomolecules with electrodes by means of fullerenes”

Dr. Oliver Brödel, *AG Molekulare Biotechnologie und Funktionelle Genomik*

“MALDI-TOF intact protein profiling as an analytical tool in diagnostics, food- and environmental Research”
