CTO/Co-founder for VR (hardware) start-up

VRetro – is a service that aims to embed VR applications into the city landscape for *edu*tainment.

In the current context of unequal educational opportunities and limited access to new data formats, my aim is to deliver a VR technology to mass-market by making it *affordable, easily accessible and simple to use*.

At the moment I'm finalising my concept and strategy. First demo content is already available. Legal entity is being in process of registration.

I am looking to partner with a Chief Technology Officer (CTO) for this challenging and exciting endeavour in Berlin, Germany. The CTO will be responsible for the engineering of the product, its technical design, planning and development.

Responsibilities in collaboration with the founder

- Organisation and planing of the implementation of the hardware components
- Embeding of the components in the service framework
- Market assessment with regard to technical hurdles
- Identification of technological trends in the industry both Virtual and Augmented Reality
- Ability to communicate the company's technology strategy to investors, staff and partners
- Collaboration with suppliers and partners to create an outstanding product experience
- Setting up and organizing internal software architecture and structure.
- Recruitement, training, retention and organization of technical staff in accordance with the company's hiring process, personnel policies, budget requirements.

Position Requirements

- University degree and working experience (preferred) in the field of computer science, engineering, VR / AR applications and hardware, telecommunications engineering or systems engineering. An advanced degree in one of these fields is a plus.
- Experience in product design & development and in strategic planning.
- Knowledge of data and video streaming.

- Basic to intermediate understanding of Virtual Reality, game development (game engines, 3d production).
- Ability to set up and organize CMS for both frontend and backend.
- Ability to set and manage priorities.
- Self-motivated and self-organized.
- Keen attention to details.
- Ability to motivate in a team-oriented, collaborative environment.
- Strong desire to learn, advance and grow.
- <u>Motivation to work in a thrilling startup environment.</u>

If you possess these skills and if you are motivated to join a promising tech startup that has the potential to shape the future of the edutainment industry, please, get in touch with me: doff.online@gmail.com

Best regards,
Evgeniy Davydov
